

St Denys' Church Aswarby

Education Group Hazard Information Sheet

We welcome school and educational groups to visit our church. All groups are responsible for their own risk assessments and we recommend group leaders to visit the church ahead of any session to write them. We have written this hazard awareness sheet as a preparatory tool and it does not replace the group leaders own risk assessment.

- Uneven surfaces throughout the church and in the graveyard.
- There are steps inside the church.
- Paths and slabs may be slippery when wet.
- Doors are large and heavy.

Please note there are unfortunately no toilet facilities at the church or in the village of Aswarby.
